INTRODUCTION

China Pacific Paper Trading Company (CPPTC) was founded in 2005. The company develops and distributes special printing papers. The unique product differentiations of CPPTC are retail-packaging specifications for environmental products and a patented anti-counterfeiting process that is verifiable at shelf level. Specific end user markets are to be found in printing and packaging for: Pharmaceuticals, Electronics, Beverage, Health and Beauty products and high-end goods such as Jewelry and Fine Watches.

CPPTC's professional multinational team has long standing industry experience worldwide. CPPTC shareholding structure includes the YUEN FOONG YU GROUP (YFY) of Taiwan. YFY is one of Asia's largest packaging and paper producing companies.

CPPTC's value added component is that it serves not only the end product in addition to their supply chain partners such as printers, packaging design companies and International Packaging Management Groups. This is achieved by developing custom solutions for paper types as well as logistics and supply chain management services.

Through CPPTC's services, the private label programs of mass retailers benefit from the Company's ability to act as a major consolidator of unified printing rather than the more traditional approach of sourcing from various countries and continents.

CPPTC develops the paper and establishes distribution within a unified network of suppliers throughout Asia.
